

THINK AND FEEL

A new generation of solutions for early detection and even prevention of forest fires with ICT-based networks of cameras and sensors.  
Humans feel like process is proven to be expensive and hard to maintain.

HEAR

Presence of fire whirls makes people identify wild fires.  
Listen to emergency officials.  
Wet down your space.  
Know how to safely operate a fire extinguisher.

SEE!

soil fertility—a benefit that has been exploited by farmers for centuries.  
Potentiality of fire to cause dangerous to property and life.

SAY AND DO?

Permanent monitoring, data collection and processing

Potential fire ALERT!

PAIN

serious disorders, including reduced lung function and premature death, wildlife mortalities, ozone layer depletion

GAIN

cleans the forest floor of debris, opens it up to sunlight
